

Development consult Day 4

Software Developer at SCK

**[https://github.com/up1/
workshop-development-consult](https://github.com/up1/workshop-development-consult)**

Topics

1. Full stack development workshop
2. Frontend with Angular
3. Backend with .NET C#
4. Database with MS SQL Server
5. Design workshop
6. Testing strategies
7. CI/CD pipeline

Full stack development

Initial projects

Write spec or requirement of features

Working with AI Agent

Working with AI Agent

Agent

Instruction and
Rules

Agent Skills

Continuous Integration Continuous Delivery

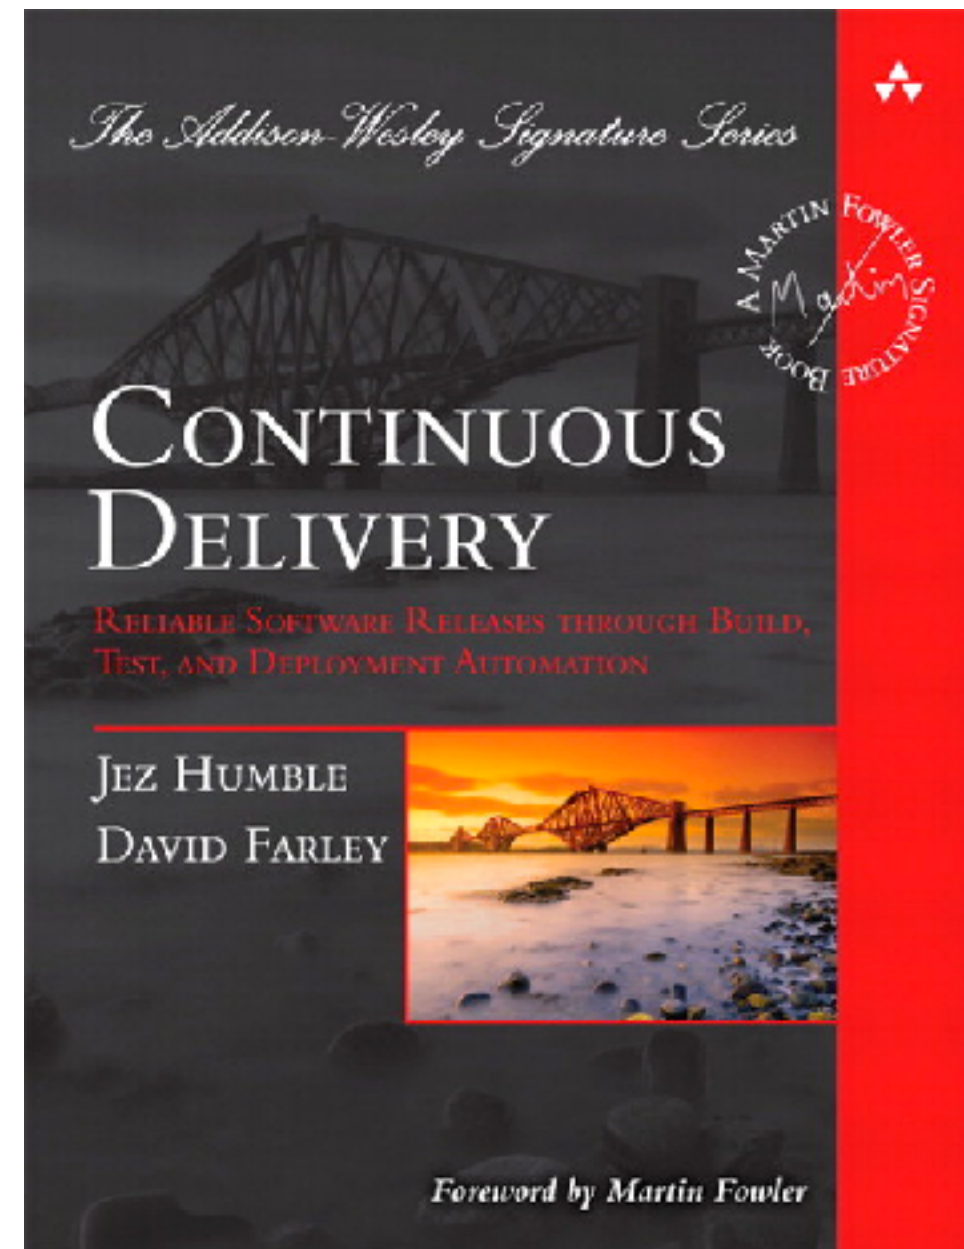

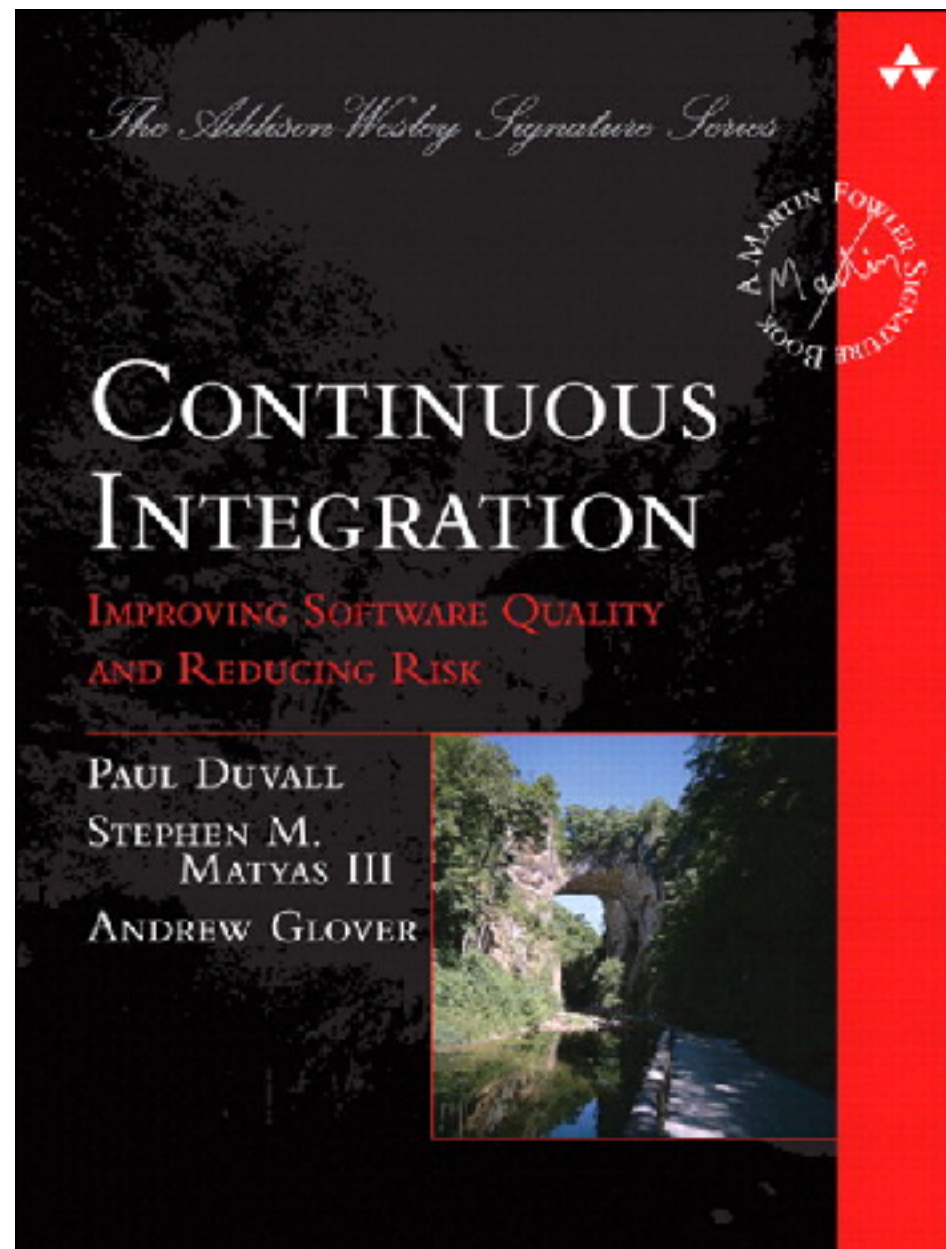

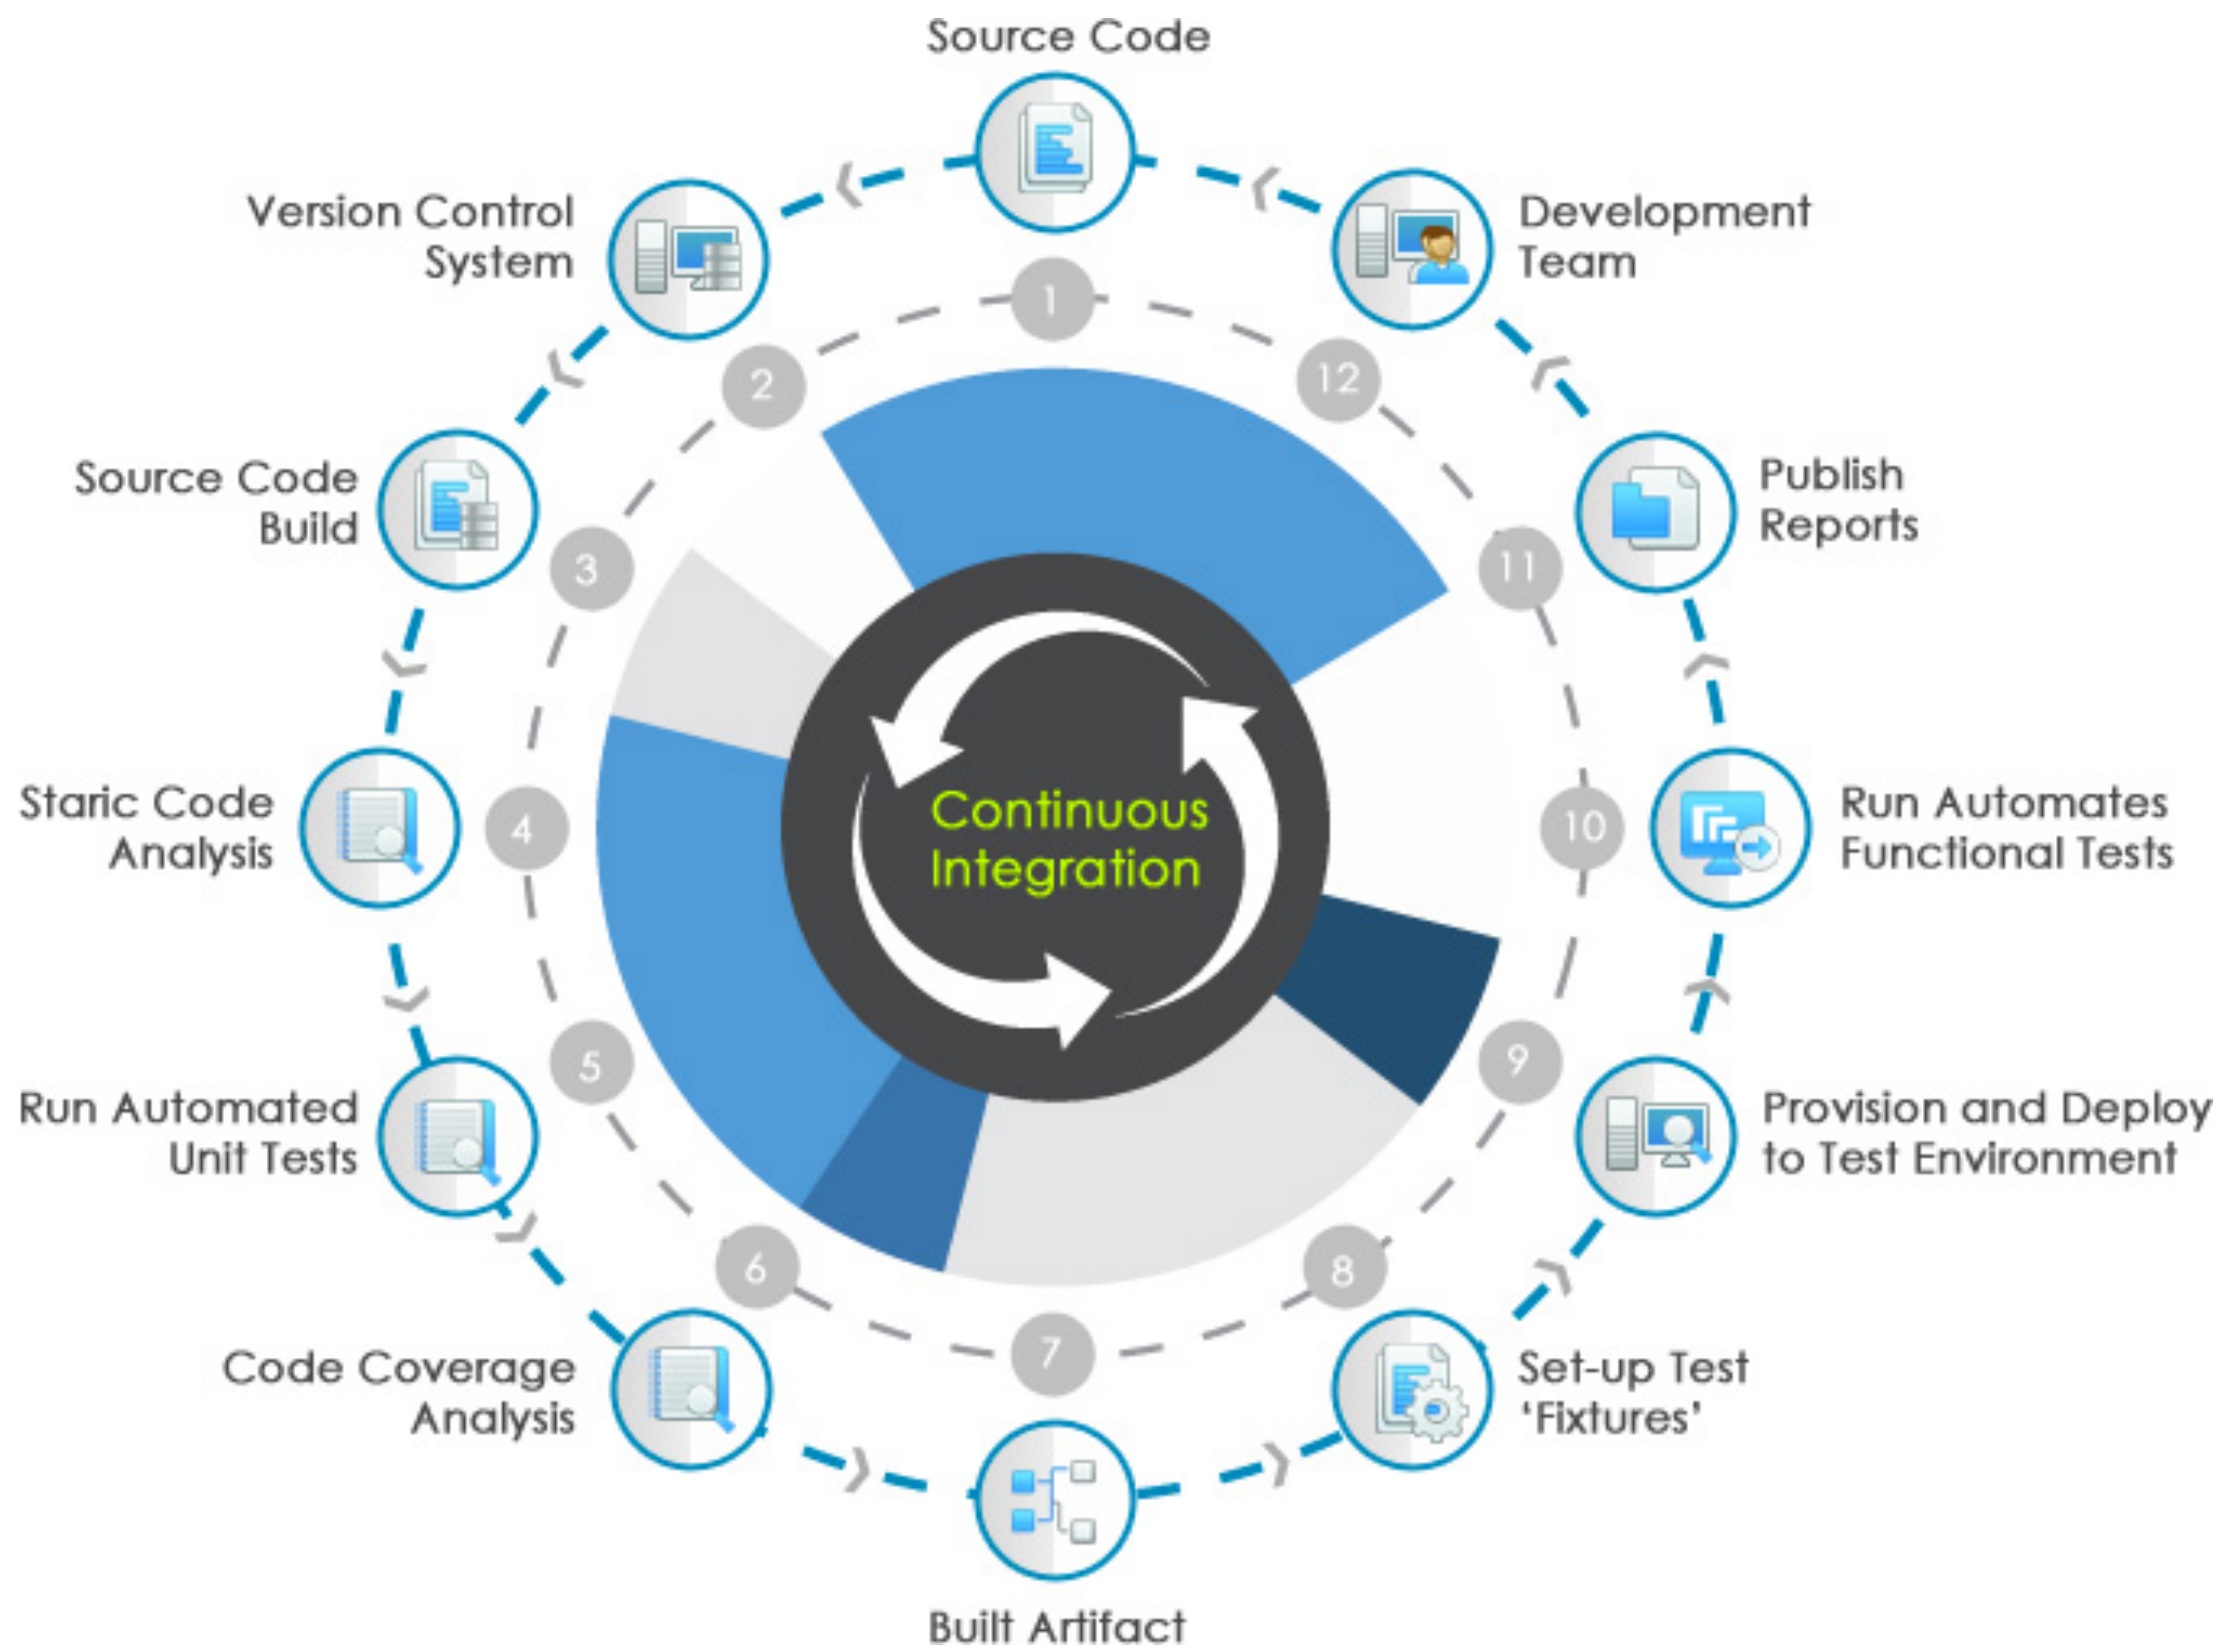

The cost of integration

1. Merging the code
2. Duplicate changes
3. Test again again !!
4. Fixing bugs
5. Impact on stability

Improve quality and reduce risk

Jenkins

Bamboo

TeamCity

Visual Studio

Team Foundation Server

Hudson

ravis

wercker

circleci

Continuous Integration

Discipline to **integrate frequently**

Continuous Integration

Strive to make **small change**

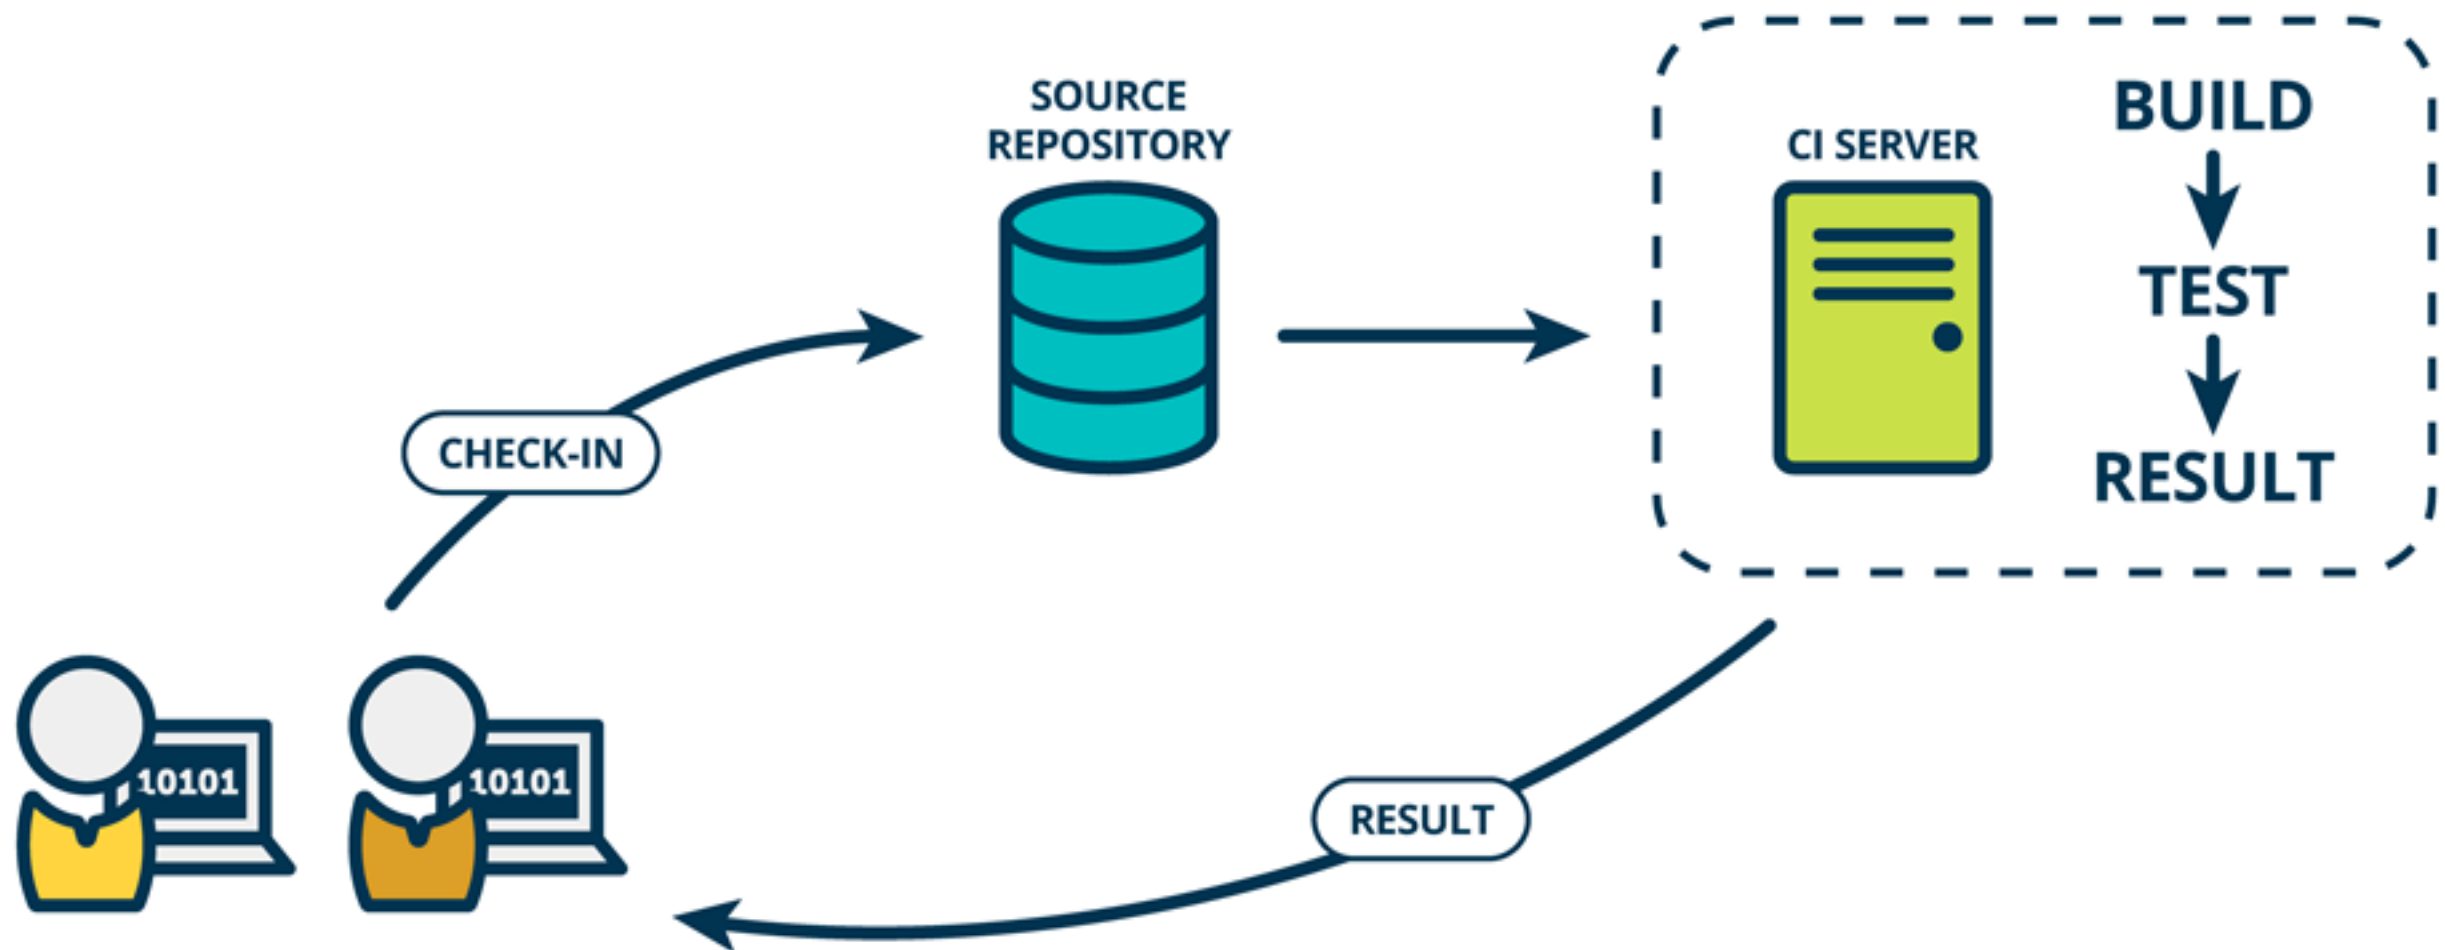

Continuous Integration

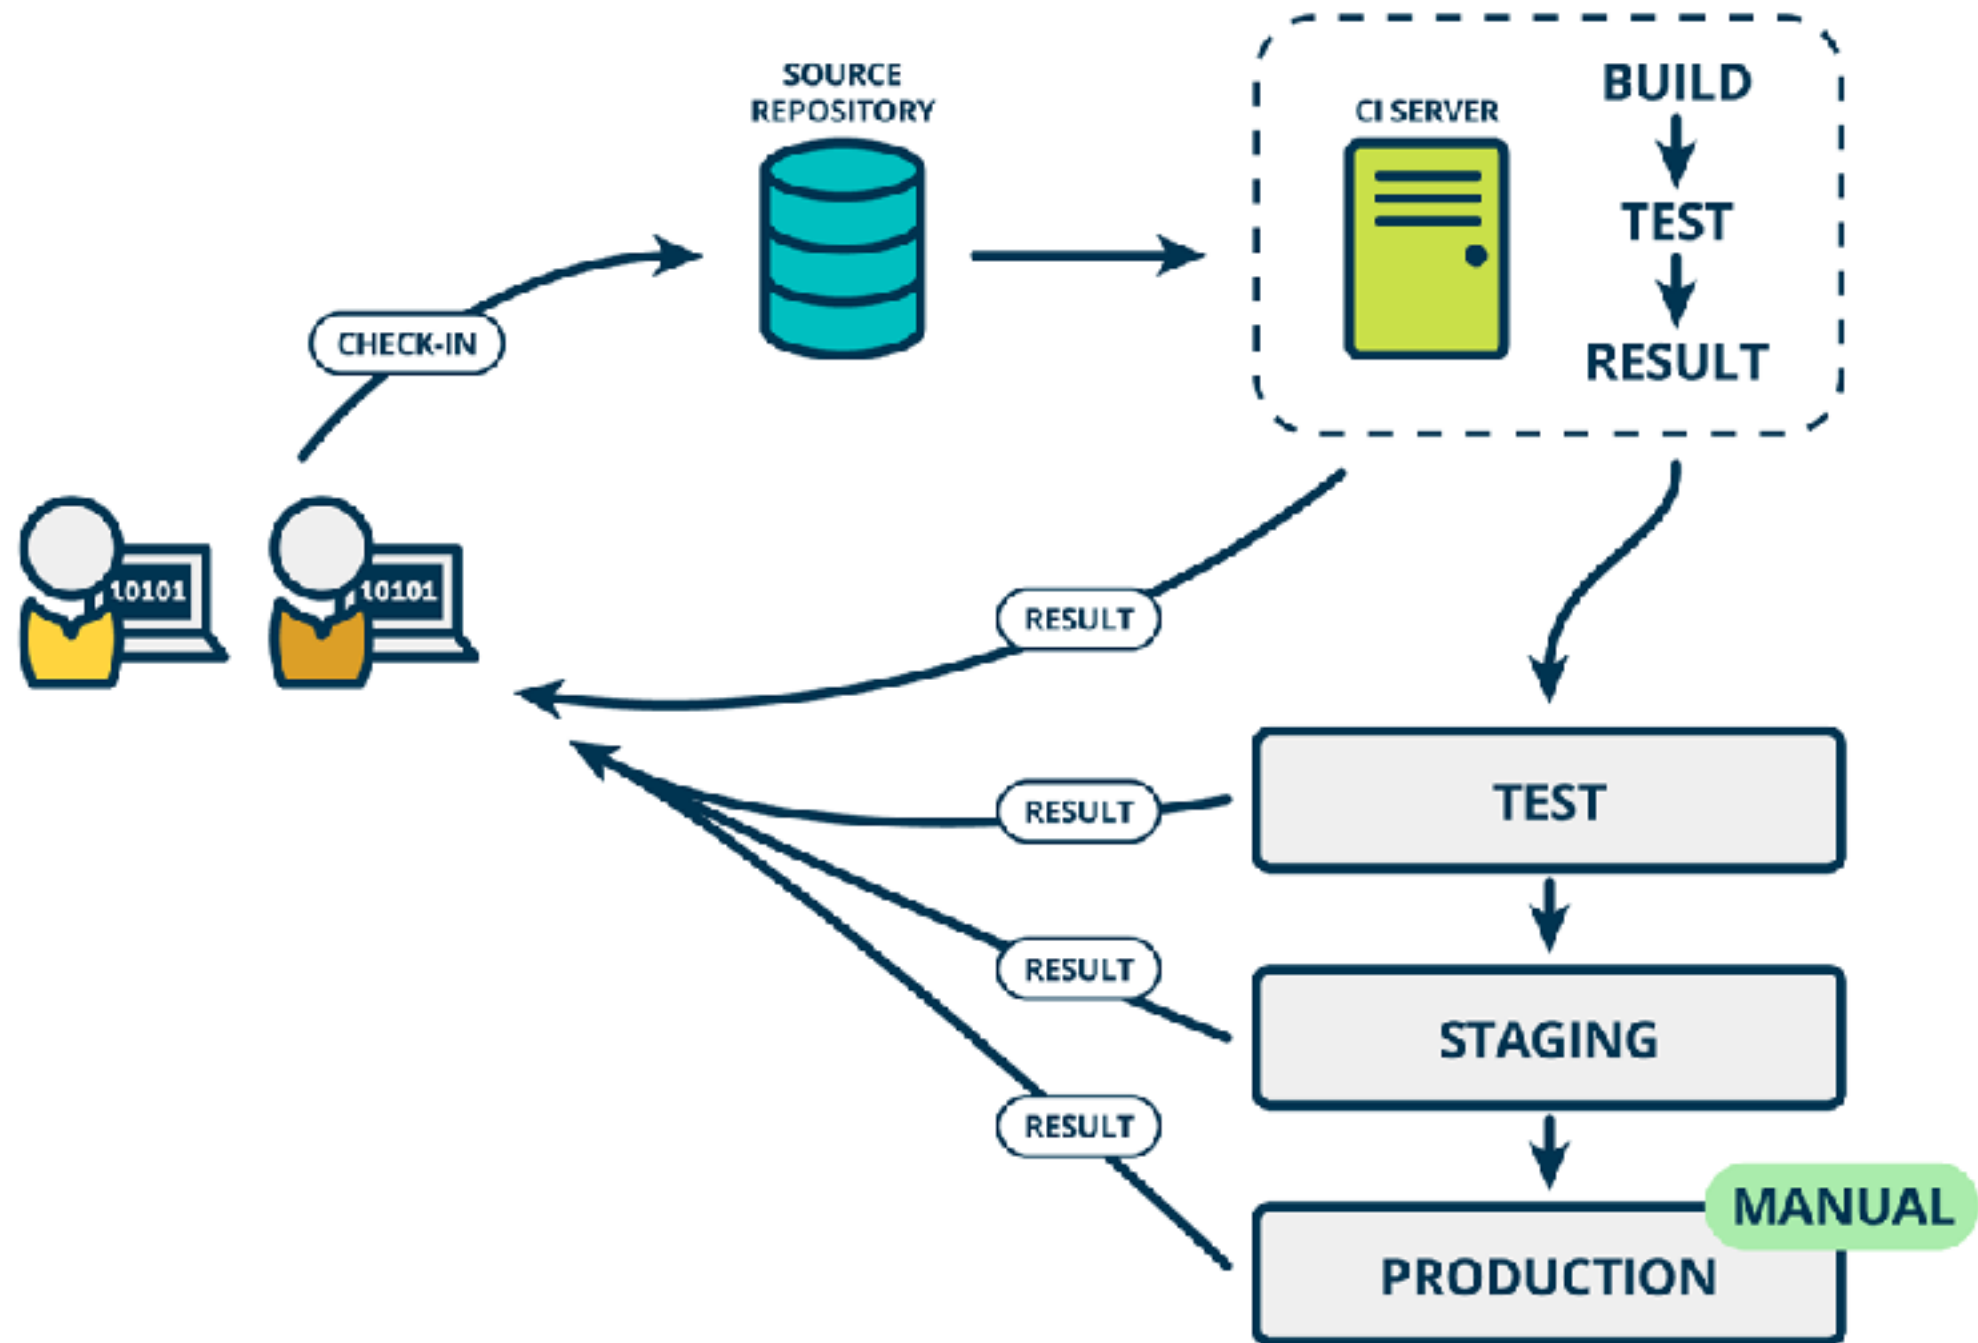

Strive for **fast feedback**

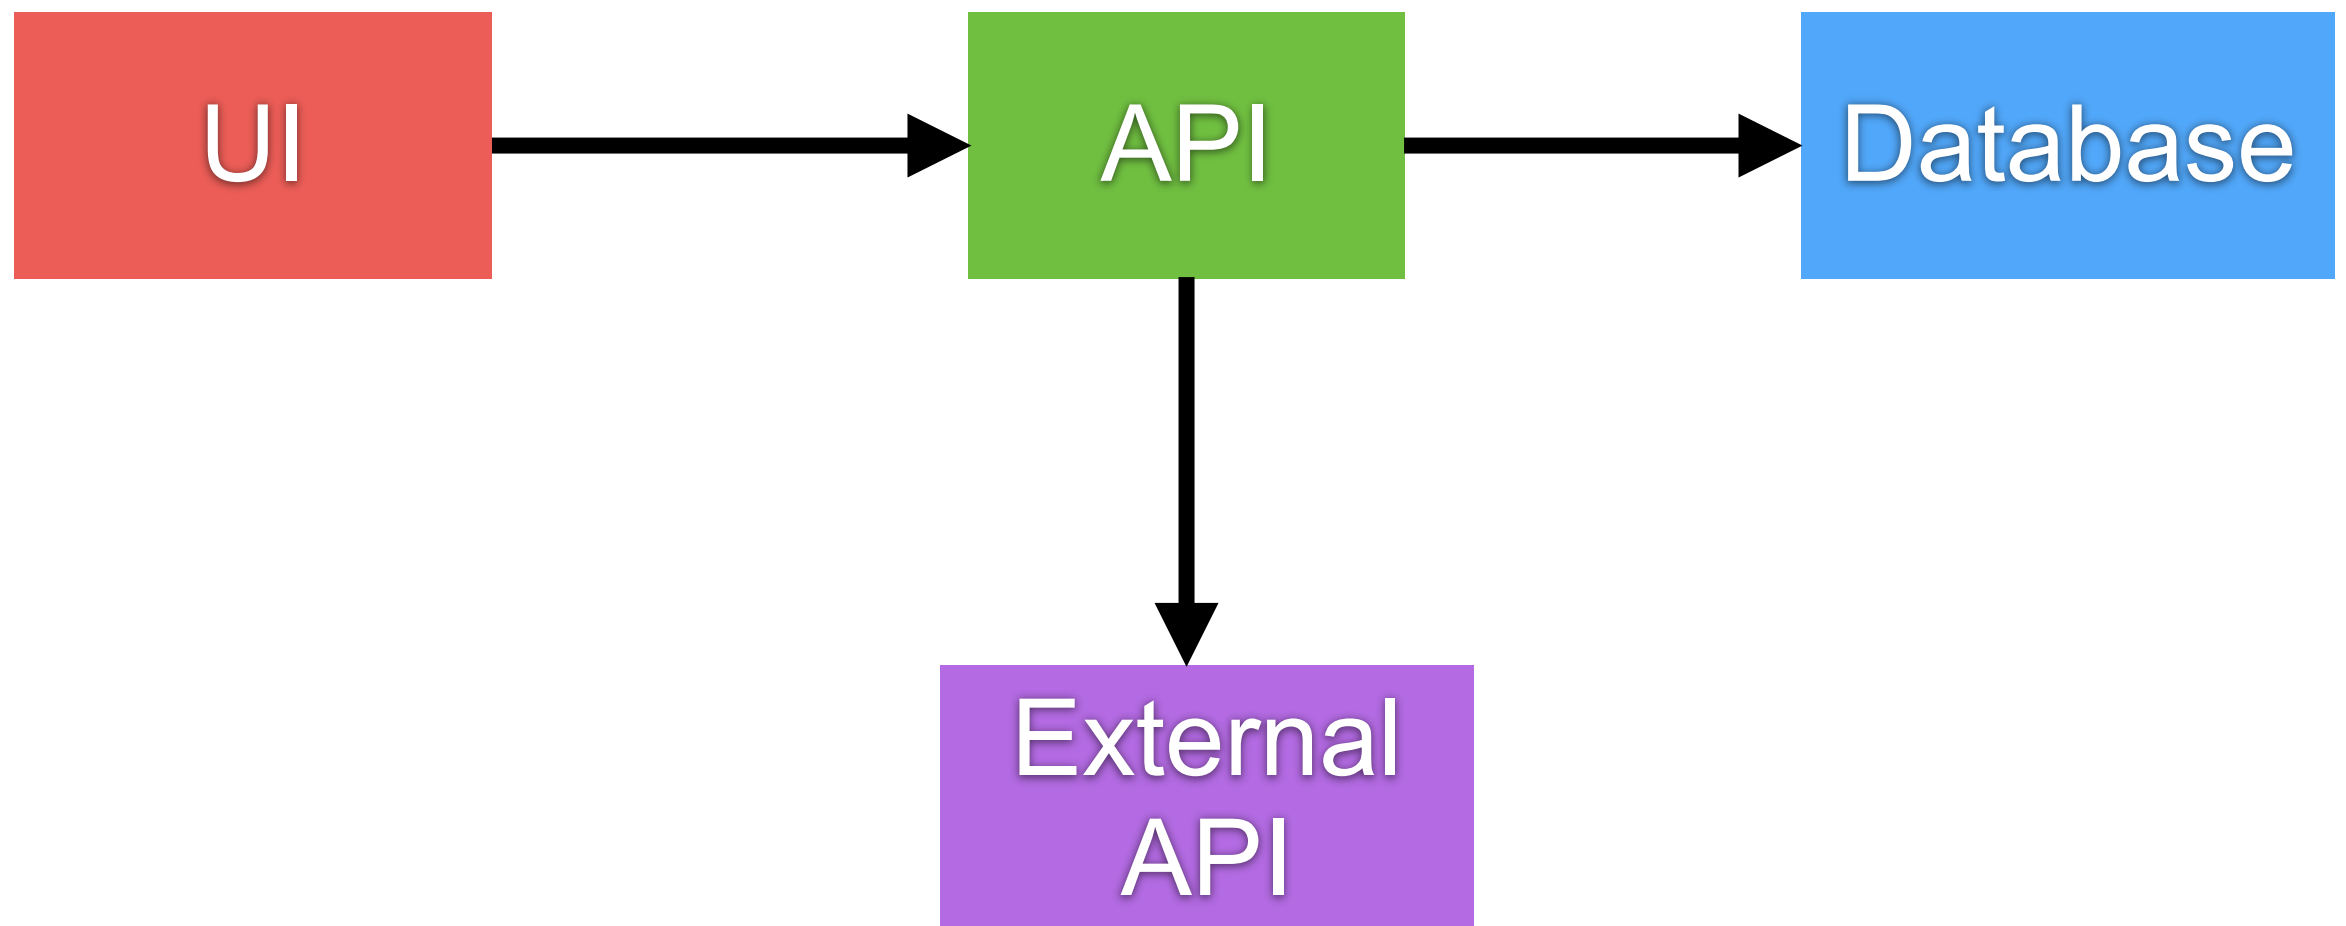

Continuous Integration

Continuous Delivery

What and How to test ?

Testing Strategies

End-to-End test

Integration test

Service component test

Contract test

Unit test

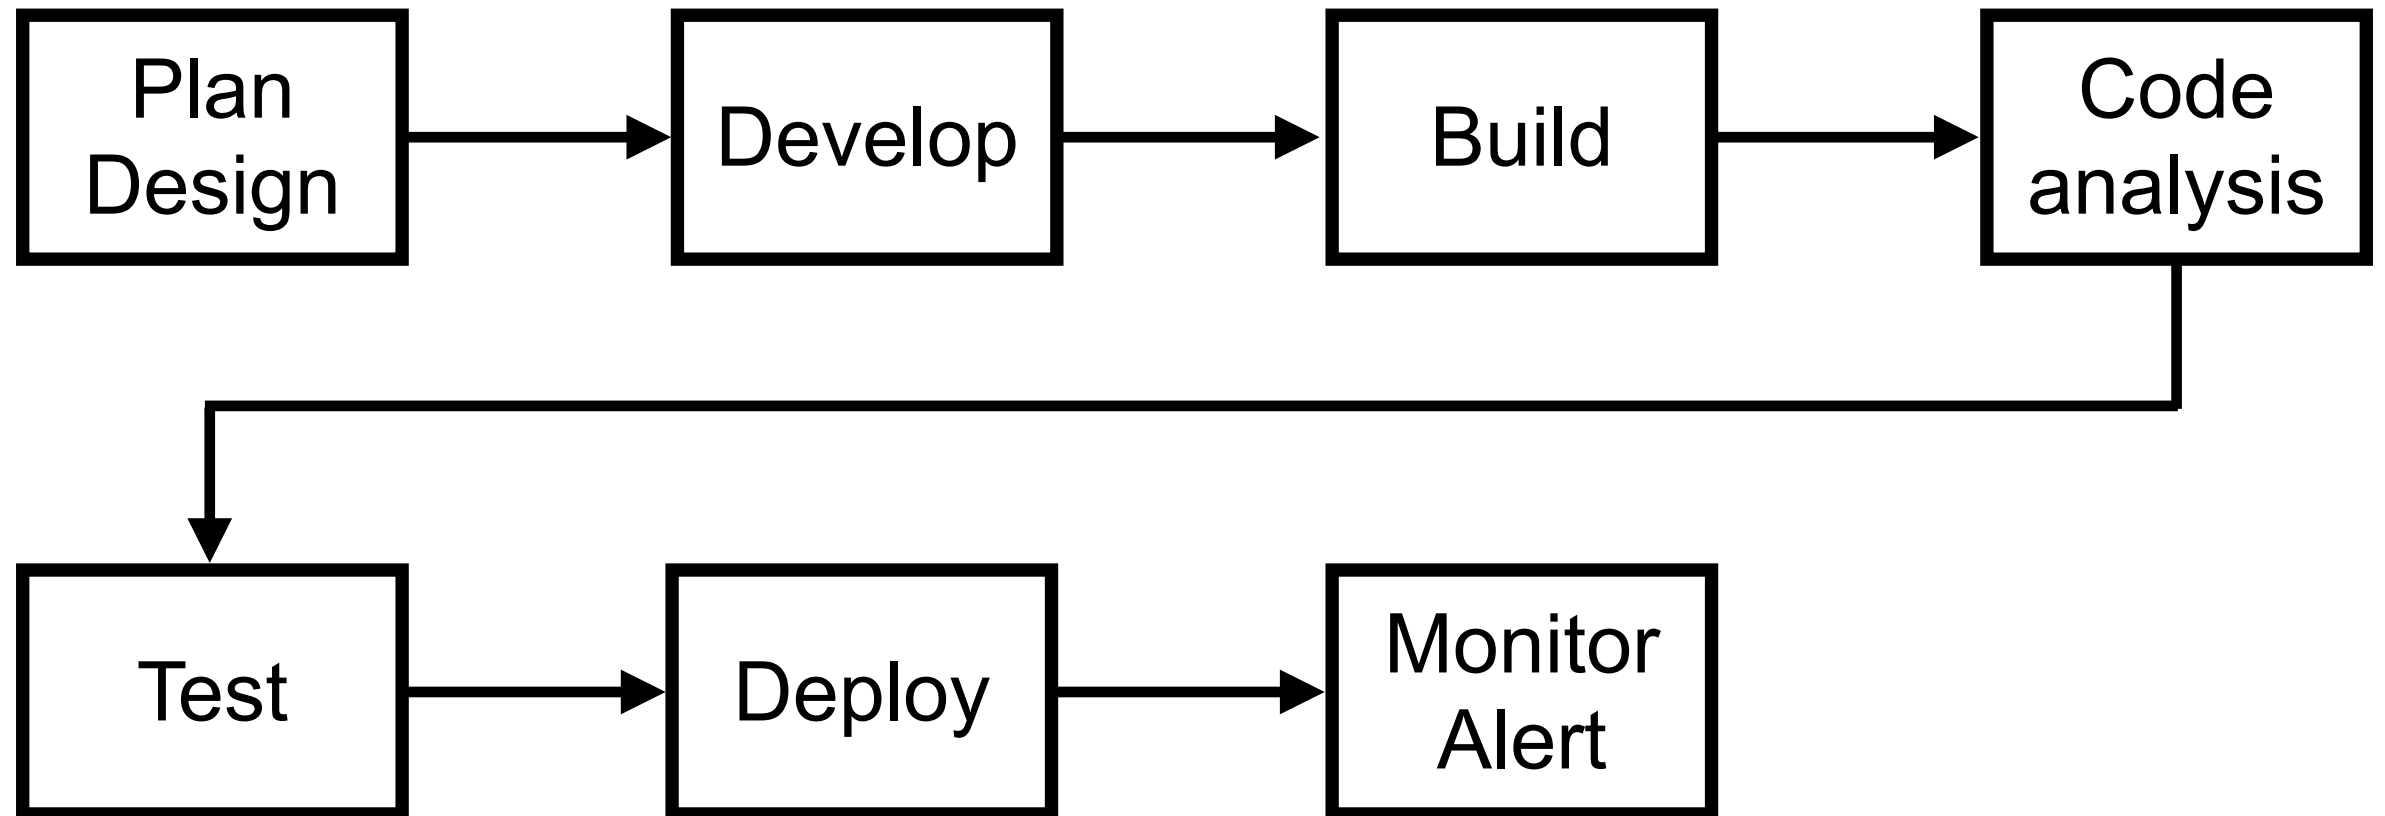

Workshop

Design your delivery process

Example Pipeline

Q/A
